About Us

Byart Group is a leading institution in Turkey in project-design, manufacturing-applications, assembly-service of awnings and sun blinds with 30 years of experince.

PergoLine produces comfortable and functional rail awning systems (motor arbour) that does not require construction permit and all collapsible, wieldy in four seasons. It conveys 40% of total capacity to mainly Europe, Turkic Republics, Middle East and African market.

PergoLine uses the material developed with the latest technology by leading manufacturers which is operating in international arena in its' all products. System designs, aluminum constructions and all accessories are designed in Italy and patented products. PVC based blackout membrane fabric is German Mehler brand, Sioen Belgium and the motor and the automation system is French Somfy brand.

PergoLine produces the latest awning technology in our country at the same time with Europe and creates comfortable spaces. It provides services in 7300 m² closed area with 74 expert staff. PergoLine, which is the most preferred company about service-guarentee, is the mover and shaker of the sector with nearly annual 1000 projects.

Capacity report of the company prepared by the Ministry of Indusrty in 2014 was assessed as "Excellent".

“

High-tech pergolas are turning seasonal outdoor places into year-round entertaining spaces.

”

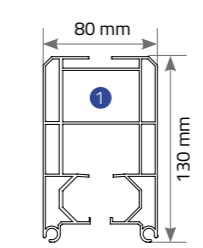

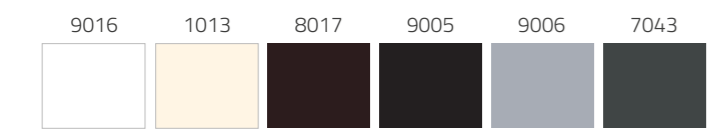

Bronze

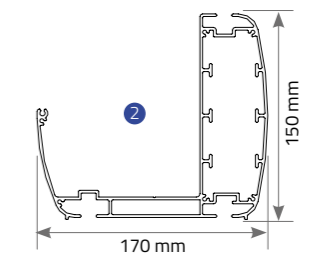

Byart Pergoline Pergola Systems are modern awning systems equipped with advanced technological features that allow you to use your living area for four seasons. The Bronze's pillar structure allows lateral areas to be covered with Vertiglass vertical automatic glass systems or heat-insulated fixed systems. In this way, the effects of adverse weather conditions are reduced and extended living spaces are created which can be used for many years. The Bronze, which can be opened up to 600 cm, is suitable for solutions in private residences or confined spaces.

Gold

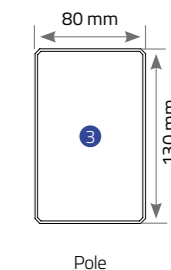

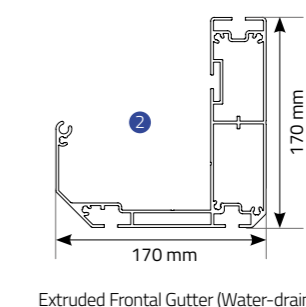

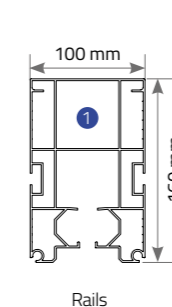

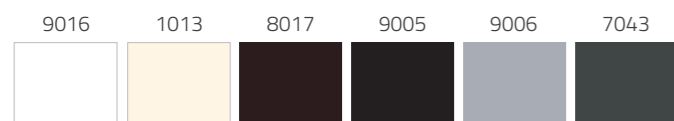

Gold is an ergonomic and functional awning system with maximum opening up to 900 cm. It can open and close automatically and surrounds the desired area to be used in summer and winter conditions with its folded and railed features. The Gold Pergola Systems are aluminum and provides a suitable solution for workplaces with its pillar structure and wide opening. It is resistant to heavy weather conditions without the need for any extra carriers. Static measurements of the product have been performed. Since it can be closed with Vertiglass Automatic Glass Systems, a new living space can be created if needed.
